

SkyHawk II-S b

Designed for the intelligent management of powered and non-powered fixed and moveable assets, the SkyHawk II-S b is a practical solution to improve operating efficiency and security.

The “Asset Ready” design allows it to be easily installed and field managed without the need for harnesses, antennas, or external power. The SkyHawk II-S b is powered by 4 “off-the-shelf” AA 1.5V lithium batteries providing 3+ years of battery life which removes the need to purchase expensive proprietary batteries for replacement.

The SkyHawk II-S b utilizes motion sensors, comparative GPS positioning and custom configured sensors to gather and transmit asset status information. Each SkyHawk II-S b is custom configured to track its asset’s specific needs and provide immediate and emergency alerts by email and/or text/cellular.
